

TWICKENHAM FAMILY DENTISTRY

Patient Appreciation Plan

Here at Twickenham Family Dentistry, we realize that one of the most common reasons people avoid needed dental care is the cost. To address this, we've created our Patient Appreciation Plan. Our goal is to help those members of our dental family who do not have insurance, yet need predictable costs for their dental care. The plan provides easy access to preventative services, such as cleanings, and makes other treatment more affordable. By paying \$315.00 for an individual plan, or \$696.00 for a family of three plan, (\$180.00 for each additional members) each participating member is entitled to the following services over a one-year period:

- 2 routine cleaning visits (includes doctor's dental exam, X-rays/radiograph needed, and our oral cancer screening (D1110, D0210, D0230, D0272, D0274, D0330, D0180))
- One Emergency evaluation per year (If Needed) and X-rays as needed at that visit.
- 30% off other services

This plan is not insurance and differs from traditional insurance in many ways. Fees are determined by a straight, across the board discount from our office's set fee schedule, not by any insurance company. There are no waiting periods for needed care; nor any predeterminations, maximum annual benefit amounts, deductibles, or denials.

The plan applies to care received within 12 months from date of plan payment. A one week grace period will be given for completion of the second routine cleaning appointment. Both routine cleaning appointments must be scheduled at the initiation of the plan. No benefits continue after the 12 month period has lapsed. This is designed to ensure that patients stay healthy receiving their needed treatment, exams, and 2 cleanings each year.

This plan is not available for individuals who already have dental insurance nor can it be used in conjunction with or secondary to dental insurance and/or medical insurance. This plan is exclusively available to patients of Twickenham Family Dentistry. Individual plan applies to one adult member of a household. No benefits are transferable among individuals.

Please note that periodontal care (periodontal maintenance (D4910), scaling and root planning (D4341, D4342), full mouth debridement (D4355), comprehensive periodontal evaluation (D0180) are excluded from this plan's inclusion, but are subject to the 30% fee reduction. Tooth whitening and orthodontic services are not covered by this plan in any manner and will be subject to the normal fee schedule for Twickenham Family Dentistry. This plan applies to services rendered by our office only and do not apply to any fees incurred from a specialist referral made by our office.
